

How to setup the finished Weatherstation

1. Get the ip Address from the RPI

Open the Terminal and type in:
Ifconfig

2. Change the IP from the Website

```
function getJson(){  
    var xmlHttp = new XMLHttpRequest();  
    xmlHttp.open("GET", "http://172.18.3.74:8080/last", false);  
    xmlHttp.send(null);  
    jsonData = JSON.parse(xmlHttp.responseText);  
    return xmlHttp.responseText;  
}
```

Here Type in the IP from the RPI
